EVENT

OVERVIEW

For over 20 years, **MTA Vietnam** has established its position as the leading international exhibition and conference for precision engineering and manufacturing in Vietnam. The event not only showcases advanced technologies and innovative solutions, but also serves as a vital bridge for businesses at home and abroad to connect, collaborate and expand into new markets. With its proven reputation and strategic vision, MTA Vietnam has become an essential platform for the industrial community – a trusted destination where international and Vietnamese companies come together to seize growth opportunities, strengthen competitiveness and advance on the path of global integration.

MTA Vietnam 2026 – The 22nd International Precision Engineering and Manufacturing Exhibition & Conference – will take place from **1st – 4th July 2026 at SECC, Ho Chi Minh City**. Marking its largest edition to date, the event will bring together more than 450 exhibitors from 21 countries and regions, offering a comprehensive outlook on the future of manufacturing. From breakthroughs in precision engineering and automation to smart manufacturing and semiconductors, the exhibition delivers a complete showcase of cutting-edge technologies. It also offers unmatched opportunities to meet Vietnam's top buyers, engage in curated business matching programmes, and gain insights into sustainable production and digital transformation – key factors to enhance competitiveness in the new era.

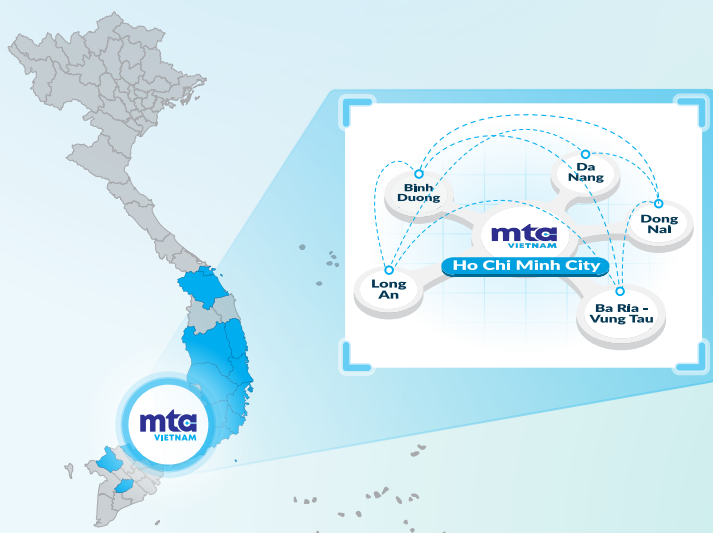

1 One of the largest and most influential international exhibitions in Vietnam, with a track record of more than 20 successful editions.

Why exhibit at MTA VIETNAM?

2 Creates thousands of business opportunities, connecting international companies with buyers from Vietnam's key industrial hubs in the South.

3 Leads the way in bringing global technological advancements to the precision engineering and manufacturing community in Vietnam, opening up exceptional growth opportunities for businesses.

VIETNAM'S MANUFACTURING SECTOR SURGES AHEAD IN 2025

According to the Ho Chi Minh City Statistics Office, the manufacturing sector continues to play a pivotal role in the national industry and remains one of the three key drivers of Vietnam's industrial growth. In the first six months of 2025, the sector attracted more than USD 12 billion in FDI. Output surged, with the industrial production index in Q1/2025 rising by 10.1%, the highest level since the Covid-19 pandemic in 2021. This double-digit growth was driven by core industries such as electronic components, metals and electrical equipment, with strong participation from both FDI and domestic enterprises.

POTENTIAL FOR THE DEVELOPMENT OF VIETNAM'S MECHANICAL ENGINEERING INDUSTRY

Vietnam's mechanical engineering sector focuses on three main sub-industries: motorbikes and spare parts; household mechanics and tools; and automobiles and auto parts. The sector generates revenues of over VND 1.7 quadrillion and provides employment for more than 1.2 million workers. Expansion strategies from major players such as VinFast and Thaco, combined with the relocation of global supply chains to Vietnam, have driven a boom in automobile production and consumption. In the first half of 2025, automobile output increased by 70.2% year-on-year, reaching a total of 226,500 units. A high localisation rate has helped reduce production costs, enhance competitiveness and create strong momentum for supporting industries.

In addition, national infrastructure projects such as the North-South Expressway spanning more than 2,063 km, and the Long Thanh International Airport – one of the largest airport projects in Southeast Asia – are giving a powerful boost to the mechanical engineering industry. With multi-billion-dollar investments and accelerated construction timelines, these projects are creating enormous demand for construction equipment, machinery, machining technologies and automation solutions. Beyond immediate infrastructure needs, they also establish long-term requirements for precision manufacturing, component production and modern logistics systems, thereby forming a highly promising market for both domestic and international suppliers.

NEW INCENTIVES POWERING VIETNAM'S SUPPORTING INDUSTRIES

(Source: www.vietnamplus.vn)

Vietnam continues to reaffirm its position as a strategic destination in the global supply chain, backed by competitive manufacturing capabilities and a favourable investment environment. From 1 September 2025, Decree 205/2025/NĐ-CP officially takes effect, expanding incentives in taxation, land, and credit for enterprises producing components, materials, and parts. This policy is expected to raise localisation rates, reduce import dependency, and build a sustainable foundation for the processing and manufacturing industries.

Among the key focus sectors, electronics and automotive are set to benefit the most, particularly in areas such as semiconductors, electric motors, control systems, and safety components. At the same time, mechanical engineering and high-tech industries are encouraged to advance mould-making, cutting tools, specialised materials, and industrial robotics. This represents a major opportunity for businesses offering precision machining, end-to-end automation, and next-generation materials to capture a rapidly expanding market.

VISITOR HIGHLIGHTS

VISITOR'S QUOTE

This is my first time attending this exhibition. I see that this is an internationally scaled event. I visited booths from Germany, South Korea, China, Taiwan, and Japan, showcasing everything from new machinery to AI-integrated software for managing production activities. I found the exhibition very useful. In the future, I hope the company members in our Ba Ria - Vung Tau Mechanical Association will adopt new improvements to enhance production efficiency.

Mr. TRAN THUONG CHI

Vice President of the Mechanical Engineering Association of Ba Ria - Vung Tau Province

Mr. PHAM DUY LONG

Director of PWM Viet Nhat Company

This is my second time attending MTA Vietnam, and I was very impressed with the last edition, so I came back this year. After following MTA Vietnam, I am interested in technologies that support production, such as vibration monitoring, infrared measurement, and post-production maintenance.

Mr. PHAM CONG DANH

Technical Department, Kureha Company, Amata Industrial Park (Bien Hoa, Dong Nai)

EXHIBITOR'S PROFILES

CUTTING TOOLS AND TOOLING SYSTEMS

- ◆ Gear Cutting
- ◆ Jigs & Fixtures
- ◆ Blades
- ◆ Rollers
- ◆ Material Handling & Storage

METAL-CUTTING MACHINES

- ◆ Boring / Drilling / Tapping Machines
- ◆ Broaching & Shaping Machines
- ◆ EDMs & Wire-Cut Machines
- ◆ Grinding Machines
- ◆ Lathes
- ◆ Metal Cutting Machines - Others
- ◆ Milling Machines
- ◆ Machining Centres
- ◆ Sawing Machines

SOFTWARE AND PROTOTYPING SYSTEMS

- ◆ CAD / CAM / CAE
- ◆ Rapid Prototyping Systems

The list is not exhaustive. Please visit our website for the full list at www.mtavietnam.com

MEASUREMENT & TESTING TECHNOLOGY

- ◆ Control, Measuring & Monitoring/ Inspection Equipment
- ◆ Coordinate Measuring Equipment
- ◆ Dimensional Measuring Devices
- ◆ Material Testing Equipment
- ◆ Precision Gauges
- ◆ Precision Measurement Software
- ◆ Fatigue & Strength Testing Equipment
- ◆ Testing, Calibration & Inspection

METAL FORMING / SHEET METAL CUTTING MACHINES

- ◆ Bending Machines
- ◆ Laser Cutting & Laser Systems / Machines
- ◆ Metal Forming / Sheet Metal Cutting Machines - Others
- ◆ Presses & Shears
- ◆ Punching & Stamping Machines
- ◆ Injection Molding Machines
- ◆ Coiling & Wire Forming Machines
- ◆ Waterjet Cutting Machines

WELDING TECHNOLOGY

- ◆ Welding Equipment

FACTORY EQUIPMENT & SYSTEMS

- ◆ Abrasives Products
- ◆ Cleaning Devices & Clean Air Systems
- ◆ Engraving & Marking Systems
- ◆ Balancing & Analysis Systems
- ◆ Power Packs & Power Tools
- ◆ Compressed Air Systems
- ◆ Power Transmission – Hydraulic Equipment and Systems
- ◆ Power Transmission – Pneumatics Equipment and Systems
- ◆ Power Transmission – Water Hydraulic Equipment & Systems
- ◆ Power Transmission – Pumps & Valves
- ◆ Fasteners & Hardware
- ◆ Workholding Device

MOULD & DIE

- ◆ Die Casting Machines
- ◆ Mould & Die

SURFACE & HEAT TREATMENT

- ◆ Heat Treatment
- ◆ Honing, Lapping & Finishing Machines
- ◆ Adhesives & Sealants
- ◆ Lubricants & Chemicals

EXHIBITOR'S TESTIMONIAL

TRUMPF VIETNAM CO., LTD.

MTA VIETNAM is an important key event in our marketing calendar. As the leading manufacturing exhibition in Vietnam, this event is highly international, and the customers' profile are attractive to us. It's a great platform for us to connect with the Vietnamese market.

Mr. KUEMMEL BENEDIKT
General Manager

DN SOLUTIONS

This is my first time attending, but I already know that this exhibition is very well. MTA Vietnam is the best manufacturing exhibition in Vietnam. Because of this, many customers visit, and many brands showcase their machines here.

Mr. ERIC LEE
Director - Southeast Asia Operations

Mr. BUI QUOC CUONG
Head of Sales Department

SODICK VIETNAM CO., LTD.

At MTA VIETNAM, Sodick has the chance to introduce our new features and latest technologies and providing customers a hands-on experience with our machines right at the exhibition. Besides, I think this year's exhibition has been quite lively, with a large number of visitors, including many of our loyal customers who came by our booth.

Mr. NGUYEN VAN NGOC
Sales Manager

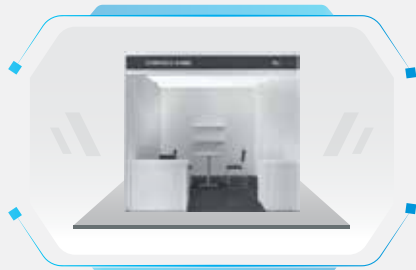

THK VIETNAM

Compared to last year, I'd say the visitor turnout at MTA this year has remained consistently high. I'm really impressed by the quality of the visitors this time — they genuinely show interest and have real demand for our brands.
